मेढा

आजकाल धकाधकीच्या आणि स्पर्धेच्या युगामध्ये माणसाकडे आरोग्य व समतोल आहार घेण्यासाठी अजिबात वेळ नाही. याचाच परिणाम म्हणून वेगवेगळ्या प्रकारच्या आरोग्याच्या बाबतीत समस्या वाढत आहेत. याचा फायदा घेऊन विदेशी कंपन्या आपली निरनिराळी उत्पादने बाजारात विकत आहेत.

या सर्व बाबींचा विचार करता निसर्गाशी नाते जोडून जंक फूडला बगल देऊन आपला परंपरागत वारसा जपण्याचा प्रयत्न आमदार शशिकांत शिंदे महाविद्यालयामधील विज्ञान शाखेच्या विद्यार्थ्यांनी रानभाज्यांचे

प्रदर्शन आयोजित करून केला.

मेढा हा भाग डोंगरदऱ्यांच्या कुशीत वसलेला व निसर्गाशी नाळ जोडलेला असल्याने, तसेच विद्यार्थी सुद्धा डोंगराळ भागातील असल्याने या उपक्रमासाठी जवळपास ४२ प्रकारच्या रान भाज्यांपासून तयार करण्यात आलेल्या पदार्थांची रेलचेल येथे दिसून आली. या उपक्रमासाठी डॉ. प्रतिमा पवार यांचे व्याख्यान आयोजित केले होते. या नाविन्यपूर्ण उपक्रमासाठी प्राचार्य डॉ. एम. बी. वाघमोडे व उपप्राचार्य डॉ. पी. आर. घाटगे यांचे मोलाचे मार्गदर्शन लाभले. समन्वयक एस. एन. गेजगे आणि विज्ञान शाखेचे सर्व प्राध्यापकांनी सहकार्य केले. कार्यक्रमाचे नियोजन डॉ. यू. एस. पवार यांनी केले.

मेढा : उपक्रमात सहभागी झालेले प्राचार्य डॉ. एम. बी. वाघमोडे, उपप्राचार्य डॉ. पी. आर. घाटगे, एस. एन. गेजगे, डॉ. यू. एस. पवार व विद्यार्थी.

**Title of the Practice:**

Knowledge E-Resources and Online Library Services (KEOLS)

**Objectives of the Practice:**

1. To offer 24/7/365 days remote access to the library e-Resources and online services for the library users from anywhere and anytime
2. To save the time of the library users by providing all e-Resources at a single online platform
3. To provide a variety of e-Resources and online services to the library users to fulfil their academic, research, administrative and routine needs
4. To reduce the expenditure on printed reading material, stationery and support to the Green Environment
5. To save the expenditure on closets/ furniture needed to keep library reading materials and save the library space
6. To promote the ICT among the library users

**The Context:**

Library – a Knowledge Resource Centre – is supposedly focal access point to all, be it a faculty, or student or any user for that matter. It, therefore, calls and warrants for easy quick/ instant access, services available at all times, irrespective of appointed working hours. Moreover, it should provide adequate space to accommodate ever-increasing uses, space for stacking the books and other learning resources, reprographic and computing facilities, providing computer nodes to all, and to be managed with available staff and resources. The resources – staff manage the library services, machines – computers and both hardware, space for library and accommodating readers/ users, and of course, the funds are generally limited, that the institutions find it different to cope up all.

To address these issues concerns ever been/ being faced and to secure services to all, to serve its users better, the institute has internally evolved a system by leveraging smart technology that assured, ensured and generates 24 x 7 x 365 days' remote access to library resources and a user-friendly online service from anywhere and anytime, a system that compliments, supplements and strengths the existing offline service resulting to optimizations of library services. The Library\_Website and Social Networking site and [QR Code](#) are used to access the library e-Resources and online services. The users can reach and get access to the specific information resource and service in a very short time with the help of the above interfaces.

**The Practice:**

To perform the above practice, the library has used open-source tools/ software that are available online and doesn't require to pay any charges.

The salient features of this innovative practice are:

- a. Developing Library Website. (<https://assmmedha.edu.in/library.jsp>)

- b. Developing Social Networking sites of Library
- c. Developing Quick Response (QR) Codes for Library Resources
- d. Providing Online Services and Facilities

**Website address:** [https://assmmedha.edu.in/library\\_krc/](https://assmmedha.edu.in/library_krc/)

The library has developed a dynamic website for its users. The library portal consists very large no of web pages with important links and other documents that are useful to fulfil the academic, research, administrative and other routine needs of the users.

If the users are at a remote place or outside of the college campus, they simply access the portal that allows 24/7/365 days remote access to the library e-resources and online services. The portal can be accessed through a desktop computer and smartphone. Most of the users access the portal through smartphones as the portal is also responsive on smartphones. The usage of the library website is increasing day by day.

### Digital Library:

Instead of providing the link of various e-book websites, it will be more helpful to give users some books, so that they can carry and read the way they wish to. Calibre is definitely a good tool to manage e-books in the library. With the features available in calibre like the inbuilt web server, metadata harvesting etc., it's a promising and a must know tool for librarians. Our Library have provided e-resources in academic libraries, e-books provide an opportunity for librarians to offer the academic community what they want – direct access to full-text content.

4. Online Public Access Catalogue (Web OPAC)
5. Inter-Library Loan Online Application System
6. Library Users Online Feedback
7. ILL- Online Union Catalogue of College Libraries
8. Shivaji University College Librarian's Directory.

Above all, the institutional endeavour has maintained, restored enhanced and facilitated library services.

### *Evidence of Success/ Impact:*

The Library Website, Social Networking sites and QR Code are found useful to library users. The website Visitor Counter for the usage of library portal proves that library e-Resources and other online services are being accessed frequently by users through desktop computers and smartphones. Smartphone devices are very much popular among young generation students and teachers while accessing library resources and services. College library is now promoting and delivering most of the services through social networking and online mode with the help of the above technological platforms.

Some of the remarkable outputs from the above practices are as below:

1. Users get quick remote access (24/7/365 days) to the e-Resources and online services of the library. It also saves their time and reduces the efforts to find useful e-Resources in their own subject field
2. The expenses on purchase of printed reading material are reduced and photocopy/ print charges to the users are also abridged due to the online availability of e-Resources and ultimately it supports to maintain the green environment
3. It saved the expenditure on closets/ furniture needed to keep library reading materials
4. It also saved the internal space of the library
5. It reduced the burden on library staff at the circulation counter while delivering the library services like circulation, reference, print, photocopy and other information services

6. The concept of conventional 'Journal Bound Volume' is replaced with 'e-Journal Archives' so that library space is saved and the expenses on binding the journal volumes are avoided absolutely.
7. Users are now able to find the list of books, periodicals and other reading material related to their subject at anytime and anywhere
8. The scheme of Inter-Library Loan is promoted online by granting access to the teachers for 'Online Union Catalogue of College Libraries' and 'Online Inter-Library Loan Application facility'
9. Conventional feedback for the library services is replaced with the 'Users Online Feedback Form' Users are now able to submit their feedback online in college website.
10. The practice promotes and motivated the library users to acquire the new ICT skills and use the ICT tools in their routine work
11. The practice has strongly promoted the core values of NAAC such as "*Contributing to National Development*" and "*Promoting the Use of Technology*" by providing free online access to the treasure of different e-Resources related to higher education at one single user-friendly interface.

***Problems Encountered & Resources Required:***

The library has stored all e-Resources on Google cloud storage that offers free storage up to 15 GB space only for each e-mail account. To upload additional documents or to use more than 15 GB of free space, the purchase of additional storage space is mandatory. To overcome this problem at an extreme level and save the charges on purchasing additional storage, the library has created a separate e-mail account for a different type of e-Resources and obtained 15 GB storage for each e-Resource. Library want more storage of server.

***Resources required:***

▪ **Hardware:**

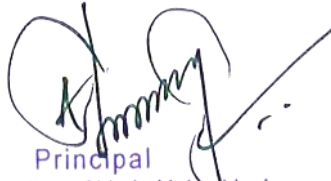

1. Desktop for processing/accessing the Web Portal, Social Networking Mobile App and QR Code Scanner and Reader.
2. Smartphone for processing/accessing the Website, Mobile App and QR Code
3. Printer for printing the QR Code

## BEST PRACTICE

### Title of the Practice: Fermented Food Festival

#### 1.Goal

- To enhance students' understanding of the mechanism of fermentation in food products.
- To make students aware about the role that microorganisms play in enhancing the nutritional value of food
- To understand amazing significance of microbes in health advantages

#### 2.The Context

Fermentation has many functions such as adding new flavors and textures to food, extending the shelf life of foods, making some nutrients more easily absorbed by the body and providing an environment for probiotics to grow and reproduce. Probiotics are beneficial bacteria that helps to grow and maintain your gut microbiome, the bacteria in your large intestine that affects in many aspects of your health. Fermented food Festival aims at the increasing consumption of health promoting probiotics. In this festival, students explain role of microorganism in fermentation process of food. This activity helps to spread awareness among the students regarding the importance of fermented food products. This said activity highlights the preparation of fermented food products like idli, Dosa, dhokla, curd rice etc. Therefore, this activity creates awareness among the students

of science faculty about the benefits of probiotic organism and preparation of fermented food product.

### 3.The Practice

This unique activity is conducted by the department of Microbiology. This activity is one of the best practices of our institution. We conduct this activity in the month of January/February because the temperature during these months, is suitable for fermentation process. Students from the departments of Botany, Zoology and Microbiology actively participate in this activity.

Students participate actively by preparing various fermented dishes which are cooked at their homes. Students give details of the recipe of the prepared dish and explain the nutritional importance of probiotic bacteria in the human diet at the time of exhibition.

### 4.Evidence of Success

This activity helps to achieve the desired goals such as to increase students understanding of the mechanism of fermentation in food products. It also highlights the role of microorganisms and its importance in enhancing the nutritional value of food. With these knowledge and information students can start their own business of fermented food and choose it as a career.

### 5.Problems Encountered

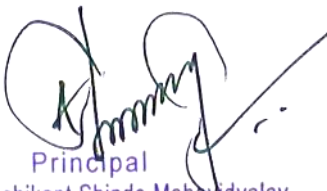

Problems normally encounter during fermentation due to the changes in temperature. Food becomes more acidic due to the change in temperature and improper incubation.

### 6.Resources Required

- Common Source of starter culture
- Traditional knowledge of recipe in written form
- Ingredients for preparation of food.
